Research
Area in the domain of Earth
Observation
Topic of action: ERA-PLANET: Global
Co-ordination of Earth Observation
Infrastructure

Welcome to SMURBS Annual Meeting

This meeting needs to be different than
usual annual project meetings!

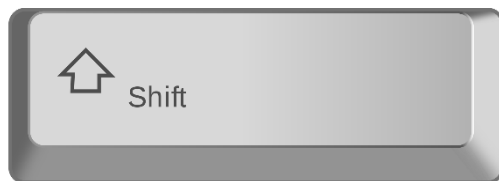

Why?

Because it is really a **MILESTONE** meeting!

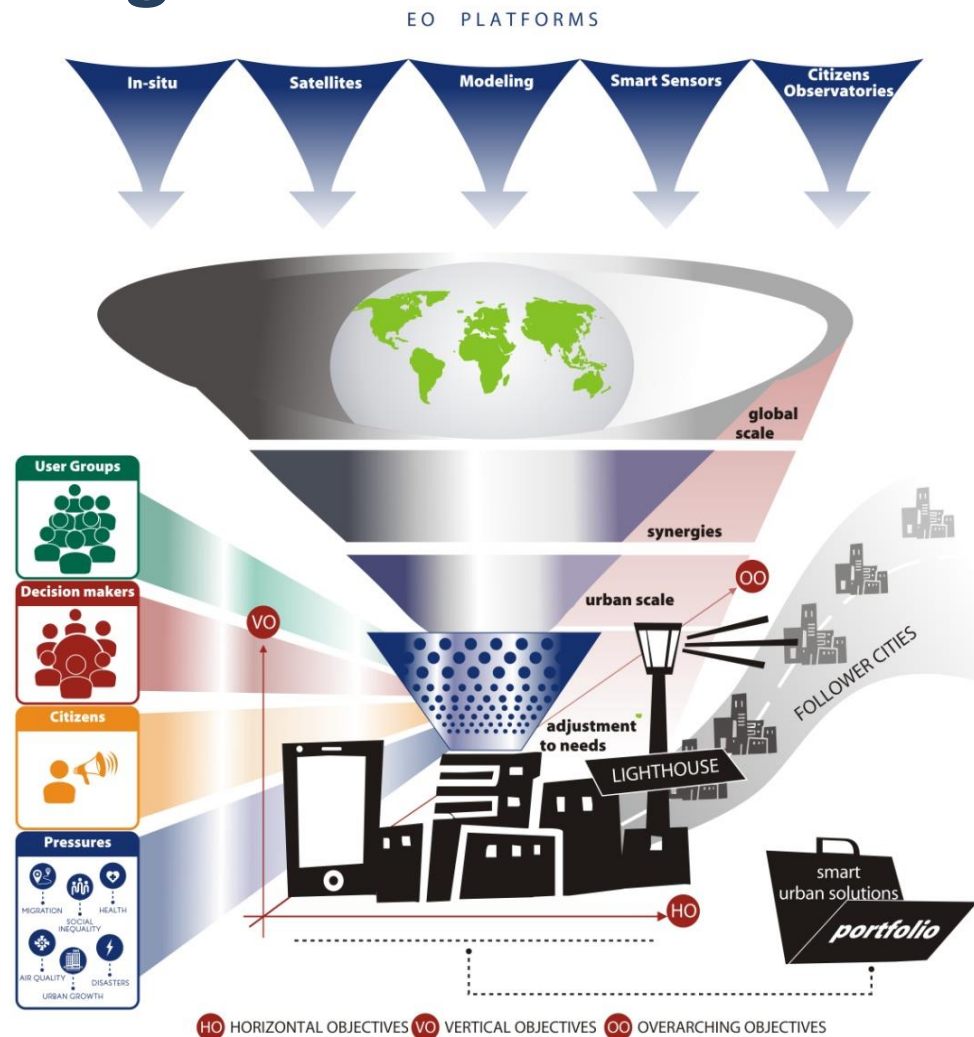

How?

1. We avoid formal presentations ... OK after maybe this first session
2. We comply to EuroGEOSS era and we co-design
3. We evaluate the suggested solutions with our per theme expertise
4. We discuss lively and make decisions
5. We keep it open also to non-partners collaborates
6. We try not to send e-mails or act business as usual
7. We have nice time!

Concept at a glance

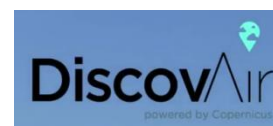

- develop synergies between EO platforms
- converge under the “smart city” banner
- take user needs on board
- tailor solutions to the thematic areas
- deliver a portfolio of smart urban solutions
- test and showcase in pilots
- let the followers amplify the impact
